FPE - Funded Researches

[2013] Knowledge Product Development of Sustainable and Integrated Area Development (SIAD) Initiatives for Rural Development

This research project revisits the evolution, concept, and distinctive elements of SIAD initiatives for rural development, particularly its contributions to climate change adaptation and biodiversity conservation.

Project Proponent/Partner: Philippine Partnership for the Development of Human Resources in Rural Areas-National (PhilDHRRA-National)

This research project revisits the evolution, concept, and distinctive elements of Sustainable and Integrated Area Development (SIAD) initiatives for rural development, particularly its contributions to climate change adaptation and biodiversity conservation. The compendium of validated case studies is now available, which includes the enhanced SIAD framework, a useful resource for capacity-building among civil society networks.

(Developments and results from the research effort will be added as updates to this page once additional information from FPE's implementing partners becomes available.)
